

Annual Production Sale

MONDAY - 1:00 PM MST

FEBRUARY 24, 2025

DILLON LIVESTOCK AUCTION - DILLON, MONTANA

Offering

156 PAP TESTED YEARLING & LONG YEARLING BULLS

Cory & Kari Lamey

Cooper Lamey (Devi) Family

Charlie & Cierra Switzer Family

W E L C O M E

We invite you to join our 17th Annual Production Sale to be held at the Dillon Livestock Auction in Dillon, Montana on Monday, February 24th. As we write this letter, we have just returned from exhibiting cattle at the National Western Stock Show and our new President will be inaugurated tomorrow. We trust he will keep livestock producers at the forefront as he navigates new trade practices and we remain cautiously optimistic that there will be a rebalancing of the dominant power the packers have over us producers, which is long overdue. With low inventory and high consumer demand, it looks like we could be on track for record prices for years to come.

This year's offering includes 150 PAP tested yearlings and long yearlings. This just may be our most uniform set of bulls we've ever offered and credit goes to our dams. We continue with our goal of producing balanced trait cattle that are fault free offering solid structure, good feet with maternal power to bring in a heavy calf at side in the fall. In addition, they must be able to survive in altitude and as you can see, most of our offering passes that test. We encourage you to study this catalog and see how the EPDs stack up among breed averages.

We hope to see you sale day, but if you are unable to attend, you may bid online via Northern Video Auction. Please see Page 2 for details. We appreciate the opportunity to be your seed stock source and invite you to come evaluate the cattle and enjoy a beef lunch starting at 11:30 on Monday, February 24th. Please contact us if you have any questions or wish to preview the cattle.

The Lameys & Switzers

Circle L Angus

8525 MT Hwy 324 • Dillon, MT 59725

ANNUAL PRODUCTION SALE

MONDAY, FEBRUARY 24, 2025

DILLON LIVESTOCK AUCTION
DILLON, MONTANA

Lunch 11:30 AM MST | Sale 1:00 PM MST

SALE DAY CONTACTS

Dillon Livestock Auction.....406-683-2002
Cory Lamey Cell.....406-491-7363
Kari Lamey Cell.....406-491-1800

SALE LOCATION

Dillon Livestock Auction is south of Dillon and east of Interstate 15. Take Exit 56 and head north or Exit 59 and head south.

AUCTIONEER

Joe Goggins.....406-861-5664

REPRESENTATIVES

Kurt Kangas, American Angus Association.....406-366-4190
John Goggins, Western Ag Reporter.....406-698-4159
Jeff Thomas, AgriMedia.....406-581-8859
Devin Murnin, Western Livestock Journal.....406-696-1502
Sam Fraser, Northern Livestock Video.....406-860-0590

INSPECTION Cattle may be inspected at Hansen Feedlot, Hwy 91 N (just past mile marker 6 on west side of Hwy) any time prior to the sale. They will be available for viewing at the sale site beginning Sunday, February 23, 2025.

WINTERING Free feed until April 1, 2025.

DELIVERY Free delivery on bulls up to 750 miles and at cost thereafter. If you choose to haul your own bulls sale day, we will deduct \$100 per head (bulls only). Buyer is responsible for heifer trucking.

BIDS/SIGHT UNSEEN GUARANTEE

If you are unable to attend the sale, please call us, the Publication Representatives, or the Auctioneer, and we will assist you with your order and offer a sight unseen satisfaction guarantee.

SALE ORDER Bulls sell in catalog order.

ACCOMMODATIONS

Fairbridge Inn Express.....406-683-3636, ask for Circle L rate.

ANNOUNCEMENTS

Check CircleLangus.com for a supplement sheet with up-to-date information. **All announcements made from the auction block take precedence over printed material in this sale book.**

Cover photo & bull pictures by Trista Bates

FIRST BREEDING SEASON GUARANTEE

All bulls selling for \$3,500 or more will be covered 50% by Circle L Angus if they are injured during their first breeding season. This guarantee does not include death as that can be insured for. Breeding season is defined as a 60-day period following the first turnout of bulls. Fifty percent of the value of the injured bull, minus one-half the salvage value, will be given credit in a future Circle L Angus sale or towards a replacement bull if one is available. Salvage value, if any, will be split equally between Circle L Angus and the buyer. All injured bulls must be diagnosed by a veterinarian. We also reserve the right to a second opinion by a veterinarian of our choice. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2025.

FERTILITY Megan Igo, DVM at Southwest Montana Vet Clinic performed a breeding soundness exam, semen test, scrotal measurement and BVD test on all bulls.

HERD HEALTH All bulls and heifers were vaccinated with Bovi-Shield Gold One Shot, 7-way with Somubac, wart vaccine, Fusoguard plus booster, Valbazen and Pour On.

PAP TEST Circle L Angus bulls were PAP tested at 5750 feet at the ranch by Britt Stubblefield, DVM, Rocky Top Veterinary Service (970-331-8955) and Lanny Weddel DVM, North Park Veterinary Clinic (970-723-8314). The PAP scores are in this catalog. For more information or recommended scores specific to your operation, contact us or the veterinary clinic.

RETAINED INTEREST Circle L Angus is retaining one-third revenue sharing semen interest in any bull sold in this sale. Full possession and full salvage value sells on all bulls.

TERMS AND CONDITIONS This sale is being conducted under the suggested sale terms and conditions adopted by the American Angus Association.

SETTLEMENT Payment is expected on sale day or at your earliest convenience. **Please make checks payable to Dillon Livestock Auction.**

GENOMIC ENHANCED EPDS

Sale bulls that have genomic enhanced EPDs through the GeneSeek test are noted by this logo.

EPDS AS OF JANUARY 10, 2025

ABSENTEE BIDDING

Setting up your absentee bidding option a few days before the sale is recommended.

**WATCH AND BID ON
NORTHERN VIDEO**

**View Cattle Videos at
northernlivestockvideo.com**

Signing up to bid on your desktop:

1. It is best to use the Google Chrome web browser.
2. Pre-Register at least one day prior to the sale.
3. Go to bid.northernlivestockvideo.com and click "Get Approved to Bid".
4. Doing this will prompt you to create an account, after which you will fill out a bidder approval application.
5. Once Approved, an email will be sent to the email account provided, please click the link in that email to activate your account and a buyer number will be provided.
6. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

Signing up on your phone:

Use your mobile device to download the Northern App and follow the above steps to get approved. There is an instructional video on how to register to bid on our website, if you have any questions.

For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.

***Special Thanks to AgWest Farm Credit
Our Sale Day Lunch Sponsor!***

Growing your future.

With over a century financing agriculture, we know firsthand the challenges and rewards you face every day. Let's work together to help you build your best future.

Contact us at 406 683 1200 or
visit AgWestFC.com to learn more.

This institution is an equal opportunity provider and employer.

WHAT IS ANGUS LINK?

Angus Link is a program run by the American Angus Association that helps cattle producers distinguish their cattle in the market by providing a Genetic Merit Scorecard, which assesses a calf crop's genetic potential based on a comprehensive genetic database; essentially, it's a tool to identify high-quality Angus cattle through genetic evaluation, allowing producers to showcase their superior bloodlines.

KEY POINTS ABOUT ANGUS LINK

- **FUNCTION** To differentiate Angus cattle based on their genetic merit, allowing producers to market their cattle as having better quality traits.
- **SCORECARD** Utilizes a genetic merit scorecard that evaluates a calf crop's potential based on various genetic factors.
- **DATABASE** Backed by a comprehensive genetic database managed by the American Angus Association.
- **VERIFICATION** Partners with a third-party verification company like IMI Global to ensure accuracy.

MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating your cattle with AngusLinkSM programs: AngusVerifiedSM and the Genetic Merit ScorecardSM. AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day. The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

Users of the AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

AngusVerified and the Genetic Merit Scorecard are administered by IMI Global.

ANGUSLINKSM
VALUE ADDED PROGRAMS

ANGUSLINK.COM | 816-383-5100

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. Accuracy will range from 0 to 1 with an accuracy closer to 1.0 indicating higher reliability. Accuracy is impacted by the amount of information that is included in the analysis including individual genotype and performance records as well as number of progeny and ancestral records.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Docility (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure EPD (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed EPD (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (\$EN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Only 1 in 4 non-parent Angus bulls qualify.

For more information on Targeting the Brand™ visit CABcattle.com.

New Release

Reg #: 19628383

Birth Date: 02/05/2019

Tattoo: 9707

Actual BW: 75

Actual WW: 803

Actual YW: 1,293

Actual SC: 38.4

Essential is an exciting new calving ease Justified son that was bred in the Arntzen program and sold to Circle L Angus in Montana. He has over 100 calves for BW with a +11 CED. He has balanced EPDs across the board and is a standout for PAP, \$M and Marbling. He is an attractive individual with added depth of body and rib that tracks well on an excellent set of feet. His daughters should make phenomenal cows with lots of maternal greats in the pedigree like Traveler 124, Great Plains, Traveler 8180, Alliance 187 and Dateline.

Comments from Cory Lamey from Circle L Angus:

"Essential is a powerhouse in a calving ease package. He was our pick of the Justified sons of the 2020 Arntzen Angus sale based upon his strong phenotype and excellent EPD profile. He is moderate, deep-ribbed, easy-fleshing and very correct. Essential produces moderate females with ideal udders and has proven himself as an outstanding PAP sire."
